

Introduction to Protective Coatings

Duration 1 day

Description This course provides an introduction to basic concepts of protective coatings; including the various types of coatings, the inspection requirements and considerations when selecting such products.

Who Should Attend? The course is designed for those working outside the corrosion or protective coatings industry, such as engineers and architects, but would be suitable for anyone requiring a brief introduction to the subject.

Course Highlights **Background Information**

Types of Coatings

Coating Inspection

Coating Maintenance

Coating Selection

Prerequisites The only prerequisite is an understanding of secondary school year 10 level of chemistry.
